Specialized Services

*MACCSimizing Body & Mind*

## SPECIALIZED SERVICES

As a company committed to the total well-being of children, MACCS Health Services, LLC has created a “Specialized Services” division that is dedicated to supporting the medical and psychological needs of students. This division provides administrators, nurses, special education teachers & coordinators, etc. with training and assistance with ACCESS billing and other services for special needs children.

**Are you losing thousands of dollars per year in untapped resources.?**

Children with physical or mental challenges can accomplish many things with the appropriate supports in place. While necessary for the developmental and functional needs of the student, these supports are often costly creating a financial strain for many districts.

**We Can Help!!!**

Did you know that schools can be reimbursed for the provision of such supports as speech, physical and occupational therapy? Did you know that many of the activities performed by the school nurse are also reimbursable?

## How Can We Help!

The medical and mental health professionals at MACCS Health Services, LLC, Division of Specialized Services have developed strategies and systems to guide and assist districts with information, advice, and training related to ACCESS reimbursement and other services for special needs children.
